PROFESSIONAL SUMMARY

Full-Stack Developer who ships experienced across the entire stack building responsive UIs, secure APIs, real-time systems, and AI-powered platforms using React, Node.js, and Python. Known for turning ideas into working products fast, with a growing edge in LLM integration and voice agent development. Looking to join a team where I can build, learn, and make an impact.

EDUCATION

NMAM Institute of Technology

Master of Computer Applications

Nitte, Karnataka

Aug 2025

SDM College of Business Management

Bachelor of Computer Applications

Mangalore, Karnataka

July 2023

EXPERIENCE

Trikon Software Labs

Full-Stack Developer

Mangalore, Karnataka

Apr 2026 – Oct 2026

- Developed a real-time, model-agnostic conversational AI backend using Pipecat and FastAPI, integrated with multiple STT, TTS, and LLM providers via WebSockets.
- Streamlined daily development with an AI-first workflow, used Codex CLI for implementation, Plan Mode to scope tasks before coding, and the Grill-Me skill to stress-test designs and surface edge cases early, reducing rework
- VoiceAgentDoctor — Built a custom diagnostic skill to analyze and optimize real-time voice-agent latency, interruptions, and STT-LLM-TTS performance using Pipecat.

MBL Technologies Pvt Ltd

Web Application Developer Intern

India

Jan 2025 – Mar 2025

- Built “Asare,” a full-featured animal trust care platform using React.js; reduced component re-renders by 20% through structured state management.
- Integrated 2 third-party APIs to extend platform functionality and improve user experience.

Accolade Tech Solutions Pvt Ltd

Software Developer Intern

Mangalore, Karnataka

Mar 2023 – Aug 2023

- Developed internal web applications using .NET and C#, delivering secure backend services and RESTful APIs.
- Designed and optimized SQL Server schemas, reducing average query execution time by ~30%.

PROJECTS

BodySync | Python, Flask, MediaPipe, OpenCV

- Built an AI-powered fitness web app using Flask and MediaPipe for real-time body pose detection and rep counting during workouts.
- Implemented a computer vision pipeline with OpenCV to track body landmarks and provide live feedback on exercise form.

AI Research & Document Assistant – RAG | Python, FAISS, Sentence Transformers, Streamlit

- Built a source-aware RAG application for PDF question answering using document chunking, semantic embeddings, FAISS retrieval, and LLM-based generation with page-level citations.
- Improved Recall@1 from 75% to 90% using cross-encoder reranking; evaluated FAISS, BM25 hybrid retrieval, and RRF across a 20-question benchmark.

Expense Tracker & Financial Analytics Dashboard | MERN, Recharts

- Built a secure multi-user financial tracking system with JWT auth and MongoDB aggregation pipelines for real-time income, expense, and category-wise analytics.
- Created an interactive Recharts dashboard with dynamic charts, reducing manual reporting effort by over 50%.

Book Store Management System | MongoDB, Express.js, React, Node.js (MERN)

- Built secure REST APIs with Node.js/Express for full CRUD inventory operations with JWT authentication and input validation.
- Designed a responsive React UI with reusable components for adding, updating, and viewing book records.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+)

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design

Backend: Node.js, Express.js, Flask, RESTful APIs

Databases: MongoDB, MySQL, Supabase, Xano

AI & Integrations: LiveKit SDK, Retell AI, nexHealth APIs, Claude AI, Plivo, OpenRouter, MediaPipe

Data & Visualization: Power BI, Recharts, MongoDB Aggregation, Stitch

Tools: Git, GitHub, Vercel, Ngrok, Socket.io, OpenAI Codex CLI
